APPLICATION INFORMATION

Please answer the following questions for the application you are inquiring about:

Customer:

Contact Name:

Address:

City, State, Zip Code:

Phone:

Fax:

Email Address:

1) What is the type of material (i.e. turkey offal, chicken carcasses, pre-broken beef bones, fish guts, sludges, etc.)

If bones what is the approximate size of the bones?

If sludge what is the solids content?

2) How will the material be feed into the pumping module?

3) How many pounds per hour of material will be pumping?

4) What is the distance that the material will be pumped?

5) Is there a vertical rise within the pipeline? If so, what is the footage?

6) Is there an existing pipeline that you may want to use? If so, what is the size of the pipe?

7) What would the V-RAM pump be pumping too? (i.e. cookers, trucks etc...)

8) Is this project an edible application?

9) What is the electrical requirement for the location of the equipment?

Each complete system is designed for the individual application and includes a pumping module, hydraulic unit and control package. We also offer multiple pumping systems for semi or full redundancy to ensure process reliability.

Please email or fax this information back to us and once this information is received by Olson Mfg, LLC/V-RAM Pumps, we will engineer and propose the best pumping systems for your application.

If you have any questions, please feel free to contact us at 888-373-3996.
